DETAILED ACTION

1. The election of the invention of Group I in paper number 5 without traverse is acknowledged.

2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaminski in view of Miller.

It would have been obvious that driven drum 4 with knurled surface 10 (see column 6 lines 33-37) of Kaminski could house the drive as taught by drum 11 of Miller. With regard to claims 3-7, the chemical composition of the drum has not been shown to be critical to the operation of the invention. Therefore, the composition of the prior art drums is considered to be functionally equivalent.
